I'm an AI-native UX/UI designer with 16 years of experience spread across three careers: strategic communications, operations, and product. Each one taught me a different way to ask: where does the user get stuck, and how do I fix it? I've applied that mindset to Fortune 500 brands, a B2B SaaS product I co-founded, a Section 508-compliant government platform, and my own consulting practice. This resume is a summary of those three careers; my LinkedIn has the full story.

Tager Consulting | Principal Designer (03/2024 – present)

Strategic Design, Research-Based Decision Making, and Multi-Platform Products

- **HCD & Digital Redesign:** Applied Human-Centered Design to reorganize a mental health clinic's patient intake experience, aligning their digital presence with high-trust medical standards and improving the end-to-end user journey.
- **Conversion Design:** Designed high-converting landing pages for an EdTech platform tailored to specific user acquisition partnerships, doubling annual revenue by removing friction between discovery and sign-up.
- **Systems & Service Design:** Led a full POS systems migration and staff training for a DC restaurant, automating the order intake process and redirecting 100% of host team focus to the guest experience.

Codiris | Co-Founder & Product Designer (04/2025 – 02/2026)

AI-Native Product, Agent-Driven Design, and O→I

- **Systems Design:** Designed an AI-native environment for product teams, orchestrating specialized agents from brainstorm to shipped product. Every agent downstream carries the full context of every decision that came before it.
- **Data-Driven Iteration:** Conducted user interviews and usability testing on v1, discovering that no users followed a linear workflow, leading to a full information architecture overhaul and a tab-based v2 that significantly improved user experience and repeat engagement.
- **Agile Collaboration:** Worked within an Agile/Scrum framework alongside a PM and two engineers across Washington DC, San Francisco, and Paris, coordinating across time zones and languages to ship a complex, AI-native product from 0 to 1.

Operations & Hospitality | General Manager & Director (08/2016 – 03/2024)

Service Design, End-to-End Experience, and Customer Loyalty

- **End-to-End Design:** Designed and launched a Shopify e-commerce platform bridging physical production and digital fulfillment, generating \$20,000+ in revenue within six months and a 20% customer return rate.
- **Strategic Leadership:** Directed post-pandemic business revitalizations across multiple venues, achieving a 30% year-over-year sales increase by redesigning service programs and optimizing the end-to-end customer journey.

Strategic Communications | Associate & Account Executive (09/2010 – 02/2016)

Strategic Messaging, Stakeholder Management, and Storytelling

- **Stakeholder Identification & Alignment:** Managed communications for Fortune 500 clients, developing strategies that translated complex business needs into clear, actionable narratives.
- **Behavioral Strategy:** Designed strategic messaging frameworks for large-scale corporate initiatives, driving user acquisition of 23,000+ applicants by removing the friction between information and action.

Education

UX/UI Design Bootcamp | Springboard, Online (03/24–04/25)

- Intensive HCD and AI-research training, including a 4-week internship at **American Dream (NJ)** designing **high-scale, omni-channel** retail and e-commerce experiences.

International Studies, BA | UC Irvine, California (2006–2010)

- Concentrations in **Mediation and Conflict Resolution** used to lead cross-functional alignment and navigate high-stakes stakeholder negotiations for complex initiatives.
